Office Action Summary	Application No. 10/623,258	Applicant(s) SEARCY ET AL.	
	Examiner SCOTT L. JARRETT	Art Unit 3623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 and 36-44, drawn to system/method for scheduling a factory to complete manufacture of an item during a shipping window , classified in class 705, subclass 8.
- II. Claims 27-35, drawn to system for synchronizing production by determining a routing schedule, classified in class 705, subclass 8.

The Inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such determining a manufacturing schedule to complete the manufacture of an item in order to meet a determined shipping window. Invention II is directed to a system for determining a routing scheduling in order to route an item via a lower cost shipping method. The subcombination has a separate utility such as determining a manufacturing and routing schedule that both meets the determined shipping window and routes the item via a lower cost shipping method. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Groups I or II are not required for Groups I or II restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
